Let's pretend she closes her eyes and picks a shirt at random. What is the probability that she picks red shirt?

$$P(r) = \frac{\#r}{\text{Total \#shirts}} = \frac{r}{y+g+r}$$

$$= \frac{7}{4+10+7} = \frac{7:7}{21:7} = \frac{1}{3} = 0.\overline{33}$$

so $P(r) = 33\%$

Question 35

Laila connects 5 boxes to create a rectangular prism as shown below. The dimensions of each of the 5 boxes are 9 cm x 9 cm x 9 cm.

What is the total surface area of the rectangular prism?

- 405 cm²
- 1620 cm²
- 1782 cm²
- 3645 cm²

Step 1 - Stuff We Need to Know
 ✓ Surface area of a box

$$A_{\square} = b \times h$$

Step 2 - Duddhawork

$$5 \times 9 \text{ cm} = 45 \text{ cm}$$

$$405 \times 4 + 81 \times 2 = 1,782$$

$$45 \times 9 = 405$$

$$4 \times 405 = 1,620$$

$$45 \text{ cm}$$

① $4 \times \text{rectangle } 45 \times 9$

$$SA = 4 \times (45 \text{ cm} \times 9 \text{ cm})$$

$$SA = 4 \times 405 \text{ cm}^2$$

$$SA = 1620 \text{ cm}^2$$

② $2 \times \text{square } 9 \text{ cm} \times 9 \text{ cm}$

$$SA = 2 \times (9 \text{ cm} \times 9 \text{ cm})$$

$$= 2 \times 81 \text{ cm}^2$$

$$= 162 \text{ cm}^2$$

③ TOTAL SA = $1620 \text{ cm}^2 + 162 \text{ cm}^2 = 1782 \text{ cm}^2$

Step 3 - Building Intuition

What is the total surface area of the 5 boxes if they were NOT connected? Do you expect the surface area to be larger and smaller than when the boxes are connected?

$$2430 - 8 \times 81 = 1782$$

$$SA = 6 \cdot (9 \text{ cm} \times 9 \text{ cm}) = 6 \cdot 81 = 486$$

$$\text{TOTAL SA} = 5 \cdot 486 = 2,430 \text{ cm}^2$$

Question 39

During a trip to Europe, Raj pays 750 euros to purchase 3 paintings.

Each painting costs the same amount.

At the time of his purchase, Raj knows that 0.68 euros are equivalent to 1 Canadian dollar.

How much does each painting cost in Canadian dollars?

A \$170.00

B \$250.00

C \$367.65

D \$1102.90

Step 2 - Duddhawork

① $\frac{750 \text{ Euros}}{3 \text{ paintings}} = 250 \text{ Euros per painting}$

② $\text{Euros} \rightarrow \text{CAD } \$$ $250/0.68=367.6471$

$$\frac{750 \text{ Euro}}{\text{purchase}} \times \frac{1 \text{ CAD\$}}{0.68 \text{ Euro}} \times \frac{1 \text{ US \$}}{1.27 \text{ CAD\$}}$$
$$= \frac{750}{(0.68 \cdot 1.27)} \quad 750/(0.68 \cdot 1.27) = 868.4576$$

Raj paid 868.46 US \$ in total for the 3 paintings.

Question 40

A recipe calls for 400 g of onions and 60 mg of spices.
